

Platinum resistance probe

Waterproof probe with a PT100 sensor (100 ohms, 0°C class B). Connection to the sensor by 2 or 3 insulated wires in a special Teflon® insulated cable.

Thermocouple probe

type J thermocouple wire insulated with a Teflon® sleeving. The hot junction tip is protected by a Teflon® shrink tube.

Flexible probe & probe mounted on heater

Type S

Type T

Type S Flexible probe coated with Teflon®

To install on a rigid support
Standard length 1,5m

Type T Flexible probe mounted on heater

The flexible Teflon® coated probe can go through the same cable-gland as the one of the heater.
Standard length 1,5m

Bendable rigid probe

Type B

Type B Bendable rigid probe

Teflon® coated probe mounted on a PP or PVDF rigid bendable frame.
Maximum L length 2m.
S=1000 mm L=500 mm

Codification (construction of the reference number)
