

# Flat heaters type C

Galvatherm®

Particularly adapted to small tank and low powers. Small overall dimensions as the structure follows the oval shape of the heating part.

Installation on the side or at the bottom

The Galvatherm heaters are specially designed with a cable that only heats the part that is to be continually immersed.

The cable is composed of a heating resistance insulated with thermal and electric components on which is co-extruded a Teflon® sheath insuring a reliable chemical resistance.

The cable is rolled up according dimensions & shapes proposed and held with PVDF, PP or FEP strips which ensure the right distance between the rolls. To secure completely the heating part it is then mounted on a flexible structure in PVDF, PP or FEP.

**Electric safety** : the Galvatherm heater complies with protection class 1 of EN 60519-1/2. The cable is screened throughout the entire length by a copper earthing strip. The earthing must be connected to the earth. In order to provide maximum safety, a fault-current (FI) protection device (30mA) should be used..

Assembly type convenient for immersion heaters with reference P30 (thickness 30 mm) , P40 (thickness 40 mm) , P90 (thickness 100 mm)

On a plastic strip structure PVDF, PP or FEP

## Options and Accessories

The Galvatherm heater is only planned to heat liquids.

### Extra length of cables

**Electrical connecting cable C**  
of type H05 VV-F (PVC) or H07 RN-F (Neopren)

**Non heating cable N**  
to go out of the tank

### Feet for type C

**Standard height 50 mm**  
Other heights possible  
For installation at the bottom of the tank

Ref in PP : PIPP  
Ref in PVDF : PIPF  
Ref in PTFE : PIPTFE

### Removable guard

**Perforated plastic guard**  
PP ou PVDF

Ref in PP : PRPPP  
Ref in PVDF : PRPPF

### Cable-gland Ø75 mm

Allow between 200 to 300 mm extra on the H length  
(H=installation height on N)

Ref in PP : PEPP  
Ref in PVDF : PEPF

# Flat heaters, reference numbers

Galvatherm®

The table below informs on the dimensions of the heating part and its references.  
 The reference number begins by P30, P40 or P90. These codes indicate the thickness 's device.  
 P30 = thickness 30 mm / P40 = 40 mm / P90 = 100 mm  
 All dimensions are given with a tolerance of  $\pm 10$  mm.  
 Standard cable coating : FEP single layer. For other coatings please contact us.
