

BASE HEATER

Mechanical thermostat

To heat and keep temperature of 200 litres plastic or metallic drums

- Simple to use
- Heat distribution on the complete surface
- Low energy consumption

This Base Heater is suitable for heating or keeping temperature of steel or plastic drums up to 200 litres.

The device is composed of an hotplate providing homogeneous heat on its surface.

Temperature adjustment is via a rear aperture in the control unit, with neons indicating power on and load switching viewed through a window in the control unit top.

Product Specification

Power 900W / 3,9A - Supply voltage : 230 V 1ph

Mechanical thermostat : from 0 to 150 °C

Power cable : 2m flexible armoured

IP40

Platen

Height 70 mm, diameter top 550 mm

Diameter base 600 mm

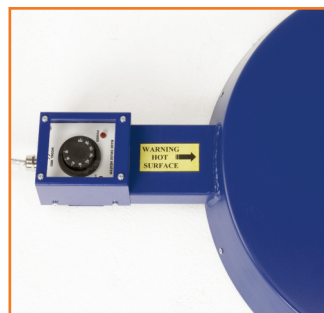

Control unit

Height 105 mm, protrusion 280 mm

Overall unit

Length 880 mm, width 600 mm

Height 105 mm

Ref. 560401

Accessories

Insulated jacket

Ref. 690402

For 200L. drums

Thermic insulation of the drum, can be used together with the base heater.

Heating jackets

May be used together with the base heater for a faster heating

Ref. 630XXX (200W à 750W)

Ref. 730403 (1200W)
