

SAFE BASE HEATER

DIGITAL ELECTRONIC THERMOSTAT

To heat and keep temperature of 210 litres plastic or metallic drums

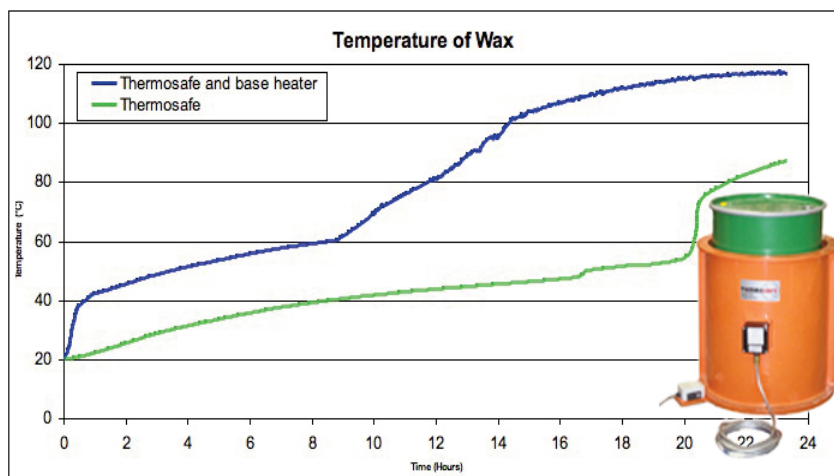

- Simple to use
- Heat distribution on the complete surface
- Low energy consumption
- Digital electronic thermostat

The DigiHeat Base Heater is suitable for heating or keeping temperature of steel or plastic drums up to 210 litres.

The Digiheat is composed of an hotplate providing homogeneous heat on its surface.

Top plate temperatures can be set and clearly displayed on the integral temperature controller.

Temperature measured at hte base of drum

A Thermosafe used together with a base heater significantly reduces the time required.

Product Specification

Power 850W / 3,5A - Supply voltage : 240 V 1ph, 50/60Hz ac
Digital electronic thermostat : from - 0 to 145 °C
Power cable : 5 m PVC insulated, sheathed galvanized steel wire braided

Overall diameter: 887 mm
Heating plate diameter : 550 mm
Overall height : 59 mm

Ref. 660402

Accessories

Insulated jacket
Ref. 690402

For 200L. drums
Thermic insulation of the drum, can be used together with the base heater.

Heating jackets

May be used together with the base heater for a faster heating

Ref. 630XXX (200W à 750W)

Ref. 730403 (1200W)
