720501	1300 W	12 kg (stock)
720502	2 x 1000 W	12 kg (stock)
720503	3 x 1000 W	14 kg (on order)

Power rating : 230 V 1ph, 50Hz
Length : 4400 mm, Height : 1000 mm
Protection degree : IP40

Power cable 3m in polyurethane,
H07-BQF

Digital thermostat

- From 0 to 90°C : réf.720502 & 720503
- From 0 to 40°C : réf.720501
- 4-digit display
- Choice of setting: setpoint temperature or heating time
- Maximum switching capacity 8 A, 230 V
- Protection type max. IP 40

720502

720501

The use of this heating jacket ensures that the product will be maintained or brought to the required temperature conditions, thus ensuring optimal working conditions.

The quality of the insulation materials, the hooks and the adjustable quick release buckles make it easy to install and a long-lasting device.

The outer face is isolated to allow better performance and lower energy losses.

Fabric Material: coated polyester polymer.

A 3 x 1000 W heating jacket is also available on special order.

ACCESSORIES

Insulated cover
Ref. 790501

Recommended for temperature use > 40° and/or ambient temperature <10°C. Can be used jointly with the heating jacket.
Dimensions 1220 x 1020 mm.
Central opening of 200 x 200 mm to reach easily the filler cap of the container. Weight 2,5 kg

Insulated total cover
Ref. 790503

Complete thermic insulation of the container in one piece without openings. Not to be used jointly with the heating jacket. Weight : 6,3 kg
Available with openings : ref. 790504

Waterproof total cover (in PVC)
Ref. 790502

Waterproof cover for outside storage of the container.
Can be used jointly with the heating jacket.
Weight : 7 kg
