

HEATING JACKET

INSULATED HEATING JACKET

To heat 200 litres plastic or metallic drums

Main advantages

- Simple to use
- Large surface contact
- Heat distribution on the complete surface
- Low energy consumption

IN STOCK
24 H DEPARTURES

Equipped with an easy to use thermostat this heating jacket is perfect for 200 litres plastic or metallic drums and can be used for a variety of heating purposes. The durable material and the tight drum fastening straps make the drum heater optimal for transporting and at the same time very long lasting. The outer face is isolated to allow better performance and lower energy losses. This type of device can effectively replace traditional heating belts.

Accessories

Base heaters

Faster heating for plastic or metallic drums. May be used together with a heating jacket

Product Specification

Power	Power rating	Insulation	Circumference	Height	Weight
1200 W	230V, 1 ph	8 mm	1990 mm	800 mm	5 kg

Material (fabric) : polyester coated with polymer and needled polyester insulation
 Power cable 3m in polyurethane, type H07RN-F, 3G 1,5mm²
 Protection degree : IP40

DigiTherm temperature controller

- 0° to 90°C
- Maximum switching capacity 8 A, 230 V
- Display 4 digit 7 segments
- Programmable heating time by integrated timer
- Protection type IP40

Ref. 730403
